LG Rise Elevator
Keep Running, As A Beating Heart Of Your Building!

BRIEF INTRODUCTION

公司简介

We are a group of deep and professional elevator practitioners. Decades of experience tell us that there are still many problems of elevator industry have to be settled urgently. Such as development of customized designs, shortage of local elevator engineers, elevator installation control, nonstandard of aftersales service operation, and outdated elevator agents & partners cooperation mode, etc.

Most of elevator suppliers take them seriously, they just provide same normal elevators and services, and they think business is over when elevator sold out. Such debated business way unable to meet local service needs for clients from oversea market.

Therefore, we build our company, LG elevator which is determined to focus on local service while providing customized elevators, we will try to support and cultivate local agents and partners, to raise elevator business cooperation to be a new higher level.

We are a young company, but our staffs are all much professional deeply in elevator industry. Such as workshop workers who have 5-15years proficient experience in operating, technical engineers who already worked for 20-30 years practices, sales who finally be qualified here already much trained, seriously selected, strictly valued. We believe our team can provide you the most attentive service to you.

We always think that: Firstly, elevator business is not only a product, but also a kind of service. Secondly, for our partners, our aim is not only make you gain money, but also try our best to Support and cultivate you to grow up with us. Thirdly, we believe in team work, the power of individual is limited, but the power of team is infinite.

It is always a pleasure to greet you to talk about cooperation plan with us. We work together, happy together!

我们是一群电梯行业的深度从业者，过去几十年经验告诉我们，仍然有很多行业痛点亟待解决，比如电梯的定制化设计，电梯专业工程师的短缺，电梯安装的质量把控，电梯售后的系统化，以及陈旧的电梯代理合作方式等等，所有这些大多数的电梯供应商都没有认真对待，他们仍然以大众化的产品，普通的服务，以及电梯一旦卖出就宣告生意结束的落后理念，越来越无法满足海外市场的本地化服务的要求。因此，我们建立了这家公司——苏州艾尔奇电梯有限公司，旨在提供优质产品的同时，聚焦本地化服务，培养本地的代理商和合作伙伴，将电梯合作上升到一个新高度。

我们虽然只是一个年轻的公司，但是我们的员工都是电梯行业的资深从业者。如车间工人都是5~15年经验的熟练工，技术工程师都是这个行业长期工作拥有20~30年经验的身经百战的技术能手，我们的业务员都是经过严格的培训，筛选，考核，最终才能留下的。我们相信我们这样的团队必定能为您提供最用心服务的。

我们始终认为：第一，电梯不仅是一个产品，更是一种服务，持续10~20年的服务；第二，对于合作伙伴，我们不仅是要让你们赚到钱，更要想方设法去支持你们，培养你们从小做大，一同成长；第三，我们信奉团队合作，个人的力量是有限的，团队的力量是无穷的。

我们欢迎有志在电梯行业发展的朋友们，前来商谈合作。一同工作一同欢乐！

PRODUCT INTRODUCTION

产品介绍

Passenger Elevator 乘客电梯

Our passenger elevators help people reach the floors quickly, comfortably, safely, and run quietly which is especially important at night. We make elevators be integrated into the buildings, and try to help building owners to reduce cost for total elevator lifetime with excellent solutions.

我们的客梯可承载人们快速、舒适、安全地到达指定楼层,而且运行地很安静,这在晚上尤其重要。我们设计的电梯方案能让电梯与建筑物融为一体,帮助业主减少电梯整个生命周期的运行成本。

Panoramic Elevator 观光电梯

Our panoramic elevators are generally running in open environments like shopping malls, hotels, office buildings etc. We have various of designs for cabins which are elegant and beautiful, attract people's attention greatly. Your buildings must reach a higher level with our panoramic elevators.

我们的观光电梯通常在开放的环境下运行,如购物中心,酒店,写字楼等。我们有各种轿厢设计,美丽大方,极大地吸引人们的注意。您的建筑必定会因为我们的观光电梯而展现出一个新的高度。

Home Elevator 家用电梯

With our home elevator solutions, you can bring your ideal vision to life. We have a variety of cabin designs, there is always one for you. Even no pit, or the space limited, we can design a matched home elevator for you.

我们的家用电梯解决方案,让您的理想照进现实。我们拥有各式各样的轿厢设计,总有一款适合您。甚至没有底坑或者空间很有限,我们也能为您设计最适合的家用电梯。

Hospital Bed Elevator 医用电梯

Our hospital bed elevators have large capacity and wide opening doors to accommodate stretchers, beds and other medical equipment, precise levelling to allow easy access for wheelchairs.

当电梯被冠以“医用”之名,则被赋予了神圣的使命。在设计时不仅要充分考虑到电梯本身的安全舒适的基本功能,还需根据医用的特定需求,提供更加宽敞和安静的乘坐空间,也需要更大的开门宽度以便担架病床等医疗设备的出入。

Freight Elevator 载货电梯

Our freight elevators are specially designed for the transportation of cargoes, big door opening, spacious cabin, strong structure, to ensure safe and steady running when loading large cargos and people. They are the best transportation machines for factories, warehouses, and malls etc.

我们的载货电梯专为货物运输而设计,宽大的开门,宽敞的轿厢,坚固的结构,保证了在运输大量货物和人员的时候依然能保持安全稳定的运行。它们已经成为工厂、仓库和商场等场所的最佳货运工具。

Escalator 自动扶梯

Our serial escalators use reliable materials and branded parts, with strong structure, to keep escalators smooth running for long time with lower noise and low-cost maintenance. They become indispensable part of shopping malls, multiplex cinema, museums, train and metro stations, airports etc.

我们的自动扶梯采用可靠的原材料和知名的部件,拥有非常坚固的结构,保证其长久稳固地运行,且噪音低,维保成本低。它们已经成为购物商场,电影院,博物馆,火车站,地铁站,机场等不可或缺的重要部分。

Moving Sidewalk 自动人行道

Our moving sidewalks have strong structure and high performance as our escalators. When your site has small angle but long span, you can choose moving sidewalks. They are popular using in high-grade shopping center, airport, big indoor place etc.

我们的自动人行道跟自动扶梯一样,拥有非常坚固的结构和高效性能。当您的现场满足倾斜角度小但跨度很大的时候,您就可以选择自动人行道。它们被用于高档购物中心,机场和其他大型的室内场所。

ELEVATOR PROFILE VIEWS

电梯剖面图

SAFETY PARTS

各安全部件

Main engine brake: Motor brake can precisely stop motor running to stop elevator runs in abnormal speed.

主机抱闸:当电梯运行速度出现异常，主机抱闸立刻工作，通过刹车来停止主机运行，从而停止电梯的运行。

Door lock: There is the cam body set in the switching range of the door of the elevator room in the lifting pathway. The cam body used to specify the opening and closing zone of the elevator door is arranged on the side wall of the elevator door, and is combined with the mobile selection component to restrict the opening of the door of the elevator room outside the opening and closing zone of the elevator door.

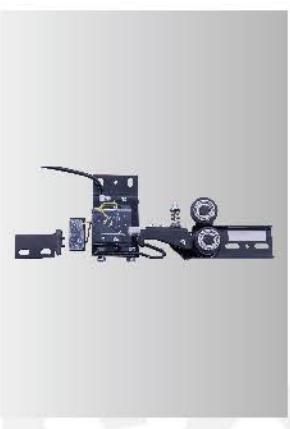

门锁:具有设置在升降通路中的电梯间门的开闭区间上，用来规定电梯间门的开闭区间的凸轮体；设置在电梯间的侧壁上，在电梯间门的开闭区间之外与上述移动选择构件配合起来限制住电梯间的门打开的限制构件。

Safety gear: Safety gear is suitable to be installed on the two sides or bottom of the lower beam. When the car descends at excessive speed, following the actuation of the speed governor, the speed governing wire rope will lift the rocker arm and enable the safety gear clamping the guide rails and stop the car to protect people inside.

安全钳:安全钳一般是安装在轿底的两侧或者底部。当电梯轿厢超速下降从而引起限速器作用于钢丝绳，进而安全钳联动，从而能有效地停住电梯轿厢，保护乘客。

Buffer: Elevator buffers are designed to protect people and equipment from forces generated from an impact resulting from equipment failure or operator error. To minimize the damages of elevator accident.

缓冲器:电梯缓冲器设计，以保护人员和设备故障或操作失误造成的冲击产生的力。将电梯事故造成的损失最大限度地减少。

Overload device: The overload device can prevent the elevator door from closing, when the load of the elevator exceeds its rated load. In the meanwhile, buzzer or display warning.

超载装置:超载装置在检测到电梯实际载重超过其额定载重时，保护电梯门防止其关闭，从而阻止电梯运行，并同时蜂鸣器响起或者显示报警。

Overspeed governor: Overspeed governor is generally installed in machine room or on top of guide rails. If the elevator descends more than 115% of rated speed, the overspeed governor will find this emergency immediately and actuate safety gear action and stop the car, playing the role of over-speed protection.

限速器:限速器一般安装在机房或者导轨上。当电梯轿厢超过额定速度115%，限速器会立刻感应到这一突发情况，拉动安全钳夹住导轨，停住电梯轿厢。

Limit switch: Limit switch is also called travel switch, is a popular small current main electrical appliances. Use the collision of mechanical moving parts to connect or break the control circuit, to achieve a certain control purpose. It can protect elevator running in a safe distance.

限位开关:限位开关又被称为行程开关，是常用的小电流电气部件。利用生产机械运动部件的碰撞使其触头动作来实现接通或断开控制电路，达到一定的控制目的。它可以保护电梯行驶在安全距离内。

Light curtain protection: The infrared receiver with rays is applied to form an infrared protection network outside the elevator door, which enhances the reliability of the whole elevator system as well as provides passengers with maximum security assurance.

光幕保护:采用红外线发生接收器，在电梯门口形成一幅红外保护网。不仅为电梯乘客提供最大限度的安全保障，而且增强了整个电梯系统的可靠性。

PASSENGER ELEVATOR

乘客电梯

Passenger elevator, it's not just a loading machine, it become a part of people's life.

乘客电梯,它不只是一种提升设备,它已经成为人们生活的一部分。

Small Machine Room
Passenger Elevator
小机房乘客电梯

255 mm

Reduce the height of the machine room 255mm
降低机房高度

40 %

Small machine room elevator,
save machine-room area
小机房电梯,节省机房面积

Machine Roomless
Passenger Elevator
无机房乘客电梯

100 %

Machine roomless elevator,
pure utility of construction area
无机房电梯,建筑空间纯利用率

25 %

It saves 25% of electric energy
节约电能

Your Goods Transportation Expert

您的货物运输专家

- ◆ The worm-and-worm-wheel traction technology, and other advanced driving and feedback technologies, such as vector control and distance control, are used to make the elevator demonstrate perfect running quality.
- ◆ Realizing precise and stable leveling with lower noise, adopt highly intensive profile making for sturdy and durable use.
- ◆ Large door opening space, adopt multi-folds lift car door to achieve maximum width for door opening, which is convenient for ingress and egress of large goods.

- ◆ 采用蜗轮蜗杆曳引技术，全面采用矢量控制、距离控制等先进的驱动和反馈技术，使电梯运行质量达到完美境界。
- ◆ 平层准确、噪音更低、运行更平稳，采用高强度的型材制作，坚固耐用。
- ◆ 开门距大，采用多折式厅轿门，达到最大开门宽度，便于大货物的进出。

HOME ELEVATOR

家用电梯

Home elevator, it's not only an elevator in the house, but also a household appliance which upgrades people's home life.

LG professional home elevator adhere to the product concept of "Precision, Customization, Profession", applies more advanced intelligent and secure technology, chooses more superior materials and equipment, to be the upgraded choice of modern people who pursue good life quality.

家用电梯，不仅仅是一台在家里使用的电梯，更是一台家用电器，极大提升了人们的家庭生活品质。

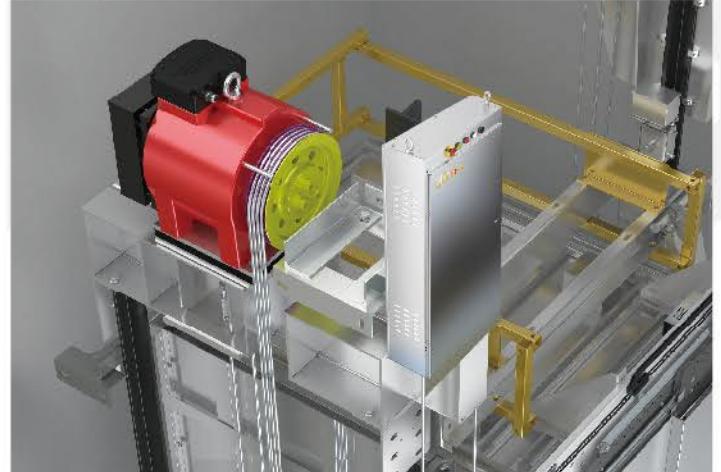

LG专业家用电梯，秉承“精工、定制、专业”的产品理念，运用更先进的智能和安全科技，选用更精良的材质和配置，倾力打造安全、健康、智能、舒适的专业家用电梯，成为现代人追求极致生活品质的升级之选。

Traction-type Home Elevator

曳引式家用电梯

It doesn't need a dedicated machine room. Occupies a small area in shaft. Has low requirements for the top height and the pit depth. It is suitable for various villa structures. Runs stably, without unbalance loading.

无需专用机房，井道占用面积小，顶层高度和底坑深度要求低，适用于各类别墅建筑结构，运行稳定无偏载，堪称家用电梯领域的经典之作。

Steel Belt-type Home Elevator

钢带式家用电梯

It changes the traditional main motor technology, adopts the design integrating driving wheels and traction rods. The efficiency of its main motor is 20% higher than that of drive motors. The composite flat steel belt has features like high wear resistance and low vibration, which ensures stable and quiet running for long time.

突破传统主机技术，采用驱动轮和曳引杆一体化设计，主机效率比传动电机高20%，复合扁平钢带，高耐磨、低振幅，无感乘行，舒适心。

Handrails For Panoramic Elevator

观光电梯扶手

We design different kinds of handrails with different materials, like stainless steel round pipe, ellipse pipe, titanium gold pipe, square pipe, wooden pipe, hairline pipe, you can select one which you prefer.

本公司根据不同轿厢装饰之特点,设计了不锈钢圆管、椭圆管、方管、钛金管、木质、不锈钢发纹板、有机柱等不同材质,不同式样的扶手十余款,造型优美、尺寸齐全,用户在购买轿厢装饰时可根据个人喜好自由选配。

ESCALATOR 自动扶梯

Our escalators will meet the requirements of different customers by excellent performance as well as practical and flexible design. The Variable Voltage and Variable Frequency (VVVF) technology, and refined manufacture process, make the escalators more perfect, secure, energy-saving and easier for maintenance.

Escalators are widely used in the places with large passenger flow like shopping malls, supermarkets, subways and airports, etc. Our escalators have features including beautiful appearance, delicate&stable structure, durable steps, modern senses.

我们的自动扶梯以性能优良、实用、灵活的设计满足不同客户的需求。微机变频技术(VVVF)和人机工程学研究成果以及先进制造技术的优先运用，使自动扶梯更趋完美、安全、舒适、节能、维修方便。

自动扶梯广泛应用于商场、超市、地铁、机场等客流量大的场所，我们的自动扶梯具备结构精巧、梯路优良、带路精致、外观造型精美、充满现代气息等特点。

MOVING SIDEWALK 自动人行道

In the public transport places and in the colorful modern cities, including large-scale supermarkets, public buildings, airports, exhibition centers and transport switching stations, our moving sidewalks can not only meet the transportation issues with huge visitors flow rate, but also meet the long-distance working and carrying of luggage barrows, baby carriages, shopping carts and vehicles for disabilities and so on, to make people have comfortable feeling when going upstairs and downstairs during shopping, they bring much convenience for people moving and become a necessary transportation solution for these places.

Our moving sidewalks have elegant appearance as well as extremely great fashion and pretty styles. They can be harmoniously integrated with the modern architecture and interior decoration, to perfectly render the design philosophy of advanced technology, safety, reliability, electricity saving, energy conservation, stability and comfort.

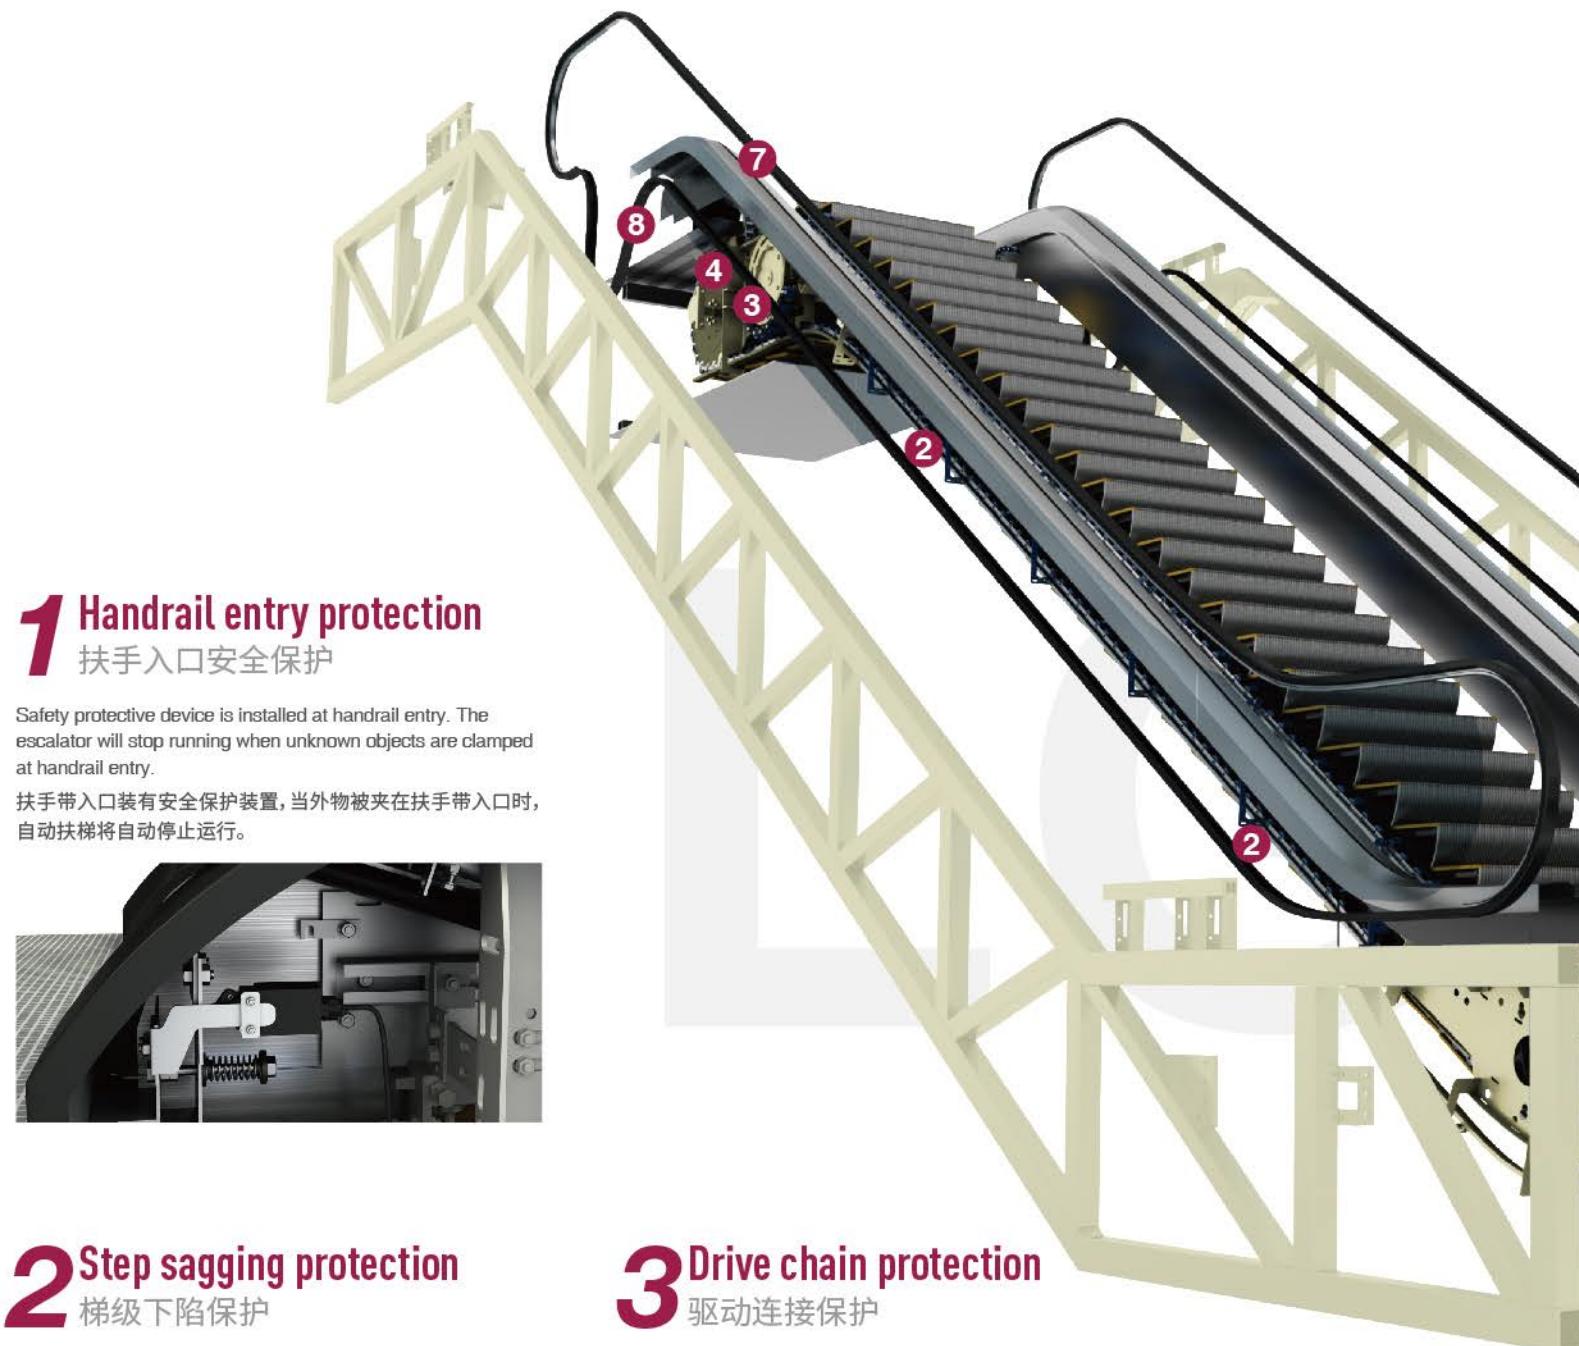

在缤纷的现代都市、大型超市、公共建筑物、机场、展览中心及运输转换站等公共交通运输场合，自动人行道因其产品自身的特点，不仅能满足人流量巨大的运输问题，也能满足长距离步行和运送行李车、婴儿车、购物车、残疾车等，使人们在乘坐的时候特别是在购物之际上楼下楼有如履平地的感觉，极大地方便了人们的出行和购物。由此也成为各大超市、机场、展览中心及运输转换站的首选解决方案。

我们的自动人行道外形豪华气派，极具时尚美感，能和大都市现代建筑和室内装饰和谐融合，完美地诠释了技术先进、安全可靠、省电节能、平稳舒适的设计理念。

EIGHT SAFETY DESIGNS

八大安全设计

1 Handrail entry protection

扶手入口安全保护

Safety protective device is installed at handrail entry. The escalator will stop running when unknown objects are clamped at handrail entry.

扶手带入口装有安全保护装置,当外物被夹在扶手带入口时,自动扶梯将自动停止运行。

2 Step sagging protection

梯级下陷保护

In order to guarantee the passengers' and equipment's safety, the escalator will stop running when the step is sagging or broken.

当梯级出行塌陷等损坏时,为了保证乘客人身安全和设备设施安全,自动扶梯将会立即停止。

3 Drive chain protection

驱动连接保护

The escalator will stop running when the drive chains are over pulled or broken.

当驱动链被过度拉伸或断裂时,自动扶梯将自动停止运行。

4 Anti-reversal protection

非操作逆转保护

Speed and running direction sensors are installed at machine side. The machine will safety brake when the escalator makes non-operating reverse.

主机侧装有速度和方向传感器,当扶梯发生逆转时,主机安全制动。

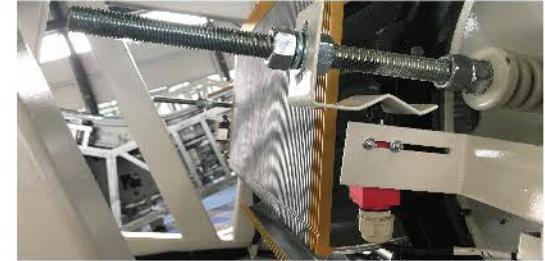

5 Step chain break protection

梯级链断裂保护

The escalator will stop running when the step chain is broken, over pulled or over shortened.

当梯级链断裂或过分伸长、缩短后,自动扶梯将会立即停止运行。

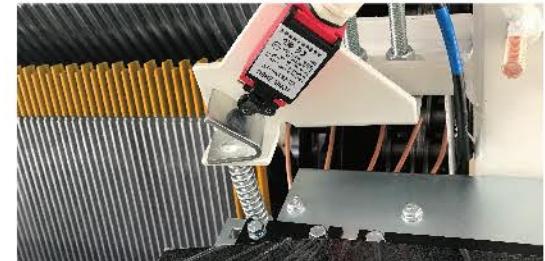

6 Comb plate protection

梳齿安全保护

When unknown objects are placed in between moving steps and static comb plate, the safety switches installed to monitor two sides of comb plate will be activated, thus the escalator will stop running.

若异物夹在运动的梯级和静止的梳齿板之间,触发监控梳齿板两侧的安全开关,自动扶梯便会自动停止。

7 Emergency stop button

急停按钮

The escalator will stop running when the button is pressed.

当按此按钮时,自动扶梯停止运行。

8 Landing plate opening protection device

楼层板打开保护装置

The landing plate safety switch will be activated when landing plate is opened, which will cut off the safety circuit and the escalator stops running.

当楼层板打开,楼层板安全开关工作,切断安全回路,自动扶梯停止运行。

ESCALATOR FUNCTION

扶梯功能配置

标准功能配置	Function Introduction 功能说明	Standard function configuration
Drive chain safety device 驱动链安全装置	If the drive chain is broken or unnecessarily long, it will touch and activate the safety switch, which will cut off the safety circuit and make the escalator stop running. 驱动链断掉或过长，即碰安全开关，安全开关动作，切断安全回路，自动扶梯停止运行。	
Phase protection device 错、断相保护装置	The device will be activated when power phase dislocation or lack detected, which will make the escalator stop running or unable to start. 在检测到电源错相或断相时动作，自动扶梯停止运行或不能起动。	
Step chain broken protection device 梯级链断链保护装置	Step chain broken switches are installed at the two sides of lower machine room. When the step chain is abraded or unnecessarily shortened with unknown reason, the safety switches will be activated to cut off the safety circuit and the escalator stop running. 在自动扶梯下段机房内两边装有梯级链断链开关，当梯级链条由于磨损或其他原因过长缩短时，安全开关动作，切断安全回路，自动扶梯停止运行。	
Handrail entry protection device 扶手入口保护装置	If any unknown objects get clamped at handrail entry, the switch will be activated to cut off the safety circuit and the escalator stop running. 在扶手带出入口处若有异物夹住，安全开关就断开，切断安全回路，自动扶梯停止运行。	
Emergency stop button 紧急停止按钮	Emergency stop buttons are installed at upper and lower ends. Press the emergency stop buttons when there is any emergent situation to cut off the safety circuit to stop the escalator from running. 在自动扶梯的上下端设有紧急停止按钮，当发生紧急情况时，按下紧急停止按钮，切断安全回路，自动扶梯停止运行。	
Non-operating reversal protection device 非操作逆转保护装置	When the escalator is changing its set running direction, the control system will make the motor off power, and the escalator will stop running. 当自动扶梯发生改变既定运行方向时，控制系统使电机失电，扶梯停止运行。	
Comb plate safety device 梳齿板安全装置	When unknown objects are into comb plate, the comb plate will make some movements to front. When moves to a certain distance, the inclined block under comb plate will strike the safety switch and activates it, then the safety circuit will be cut off and the escalator stop running. 当异物嵌入梳齿板后，梳齿板向前移动，当移动到一定距离时，梳齿下方的斜块撞击安全开关，安全开关动作，切断安全回路，自动扶梯停止运行。	
Landing plate opening protection device 楼层板打开保护装置	The landing plate safety switch will be activated when landing plate is opened, which will cut off the safety circuit and the escalator stop running. 当楼层板打开，楼层板安全开关工作；切断安全回路，自动扶梯停止运行。	
Step missing protection device 梯级丢失保护装置	When step is detected to be missing, the control system will stop the escalator from running. 当监测到梯级缺失时，控制系统使扶梯停止运行。	
Handrail speed detection protection 扶手带速测保护	When the handrail speed is not in accordance with step running speed, the system will stop the escalator from running. 当扶手带速度与梯级运行速度不同时，系统将自动检测，并使扶梯停止运行。	
Step sagging protection device 梯级下陷保护装置	When step or roller is broken, it will sag and activate the safety switch, which will cut off the safety circuit and stop the escalator from running. 当梯级断裂或滚轮破裂时梯级下陷开关启动，切断安全回路，自动扶梯停止运行。	
Motor overload protection 电机过载保护	When the motor current is detected to over the set value, safety switch will be activated, then to stop the escalator from running. 在检测到电机电流超过设定值时动作，自动扶梯停止运行。	
Circuit grounding device 电路接地装置	Grounding device is set in control system circuit, which will effectively protect the electrical components from damages and improve the escalator running reliability. 在控制系统电路中设置了接地装置，有效地保护电器原件不受损坏，增加了扶梯运行可靠性。	
Step gap illumination 绿色梯级间隙照明	Install green lighting below the steps at upper and lower ends, which improve the brightness at entrance and exit, leading passengers to safely taking the escalators. 在上下端出入口处梯级下设置绿色照明，提高了出入口的亮度，引导乘梯人员安全乘梯。	
Overspeed & underspeed protection 超速欠速保护	When escalator is running at set overspeed or underspeed, the control system will cut off motor power so that the escalator will stop running. 当扶梯超速欠速达到设定值运转时，控制系统使电机失电，扶梯停止运行。	
Upper and lower inspection switches and sockets 上下检修开关及插座	Inspection switches and sockets are installed at upper and lower machine room, which is convenient for the maintenance worker to do their job. 在上下机房内设置检修开关及插座，方便了维护人员进行检修和维护作业。	
Yellow demarcation lines 安全黄色警界线	The steps are with yellow demarcation lines at front and sides, leading passengers to safely taking the escalator and improve the safety. 在梯级的上平面前端和两侧设置安全黄色警界线，引导乘梯人员安全乘梯，增加了乘梯人员的安全性。	
Automatic lubrication device 自动加油装置	Automatic lubricating system with oil level detection device will stop the escalator to avoid over abrasion. 自动扶梯的自动加油润滑系统，带油位检测功能，当油量过少时，自动扶梯停梯，防止过度磨损。	
Brake release detecting 抱闸打开检测	When the escalator is setting in motion and the brake didn't release, the control system will cut off motor power to stop the escalator from running to protect the machine. 当自动扶梯启动，主机制动抱闸没有打开，为了保护主机，控制系统使电机失电，扶梯停止运行。	
Step anti-static brush 梯级防静电刷	This device will induct the step surface static electricity into ground to avoid the electric shock when passengers touch the steps. 该装置将梯级表面的静电导入大地，避免人身体接触时的触电感。	
Skirt panel anti-clamp device 裙板防夹装置	When passengers stand at the edges of the step, they will touch the brush. It will remind them to stand at the middle of the step to avoid their cloths getting clamped into the gaps between steps and skirt panel. 当人站在梯级边缘时就会碰到毛刷，提醒人站到梯级的中间，防止衣物夹入梯级与裙板之间的缝隙。	
Fault code display 故障代码显示	When there is any fault, the fault display will show the fault codes to ensure that parts with fault can be precisely noticed, which can greatly improve maintenance efficiency. 当有故障发生时，故障代码就会显示在故障屏幕上，准确的判断故障部位，大大地提高了维修效率。	

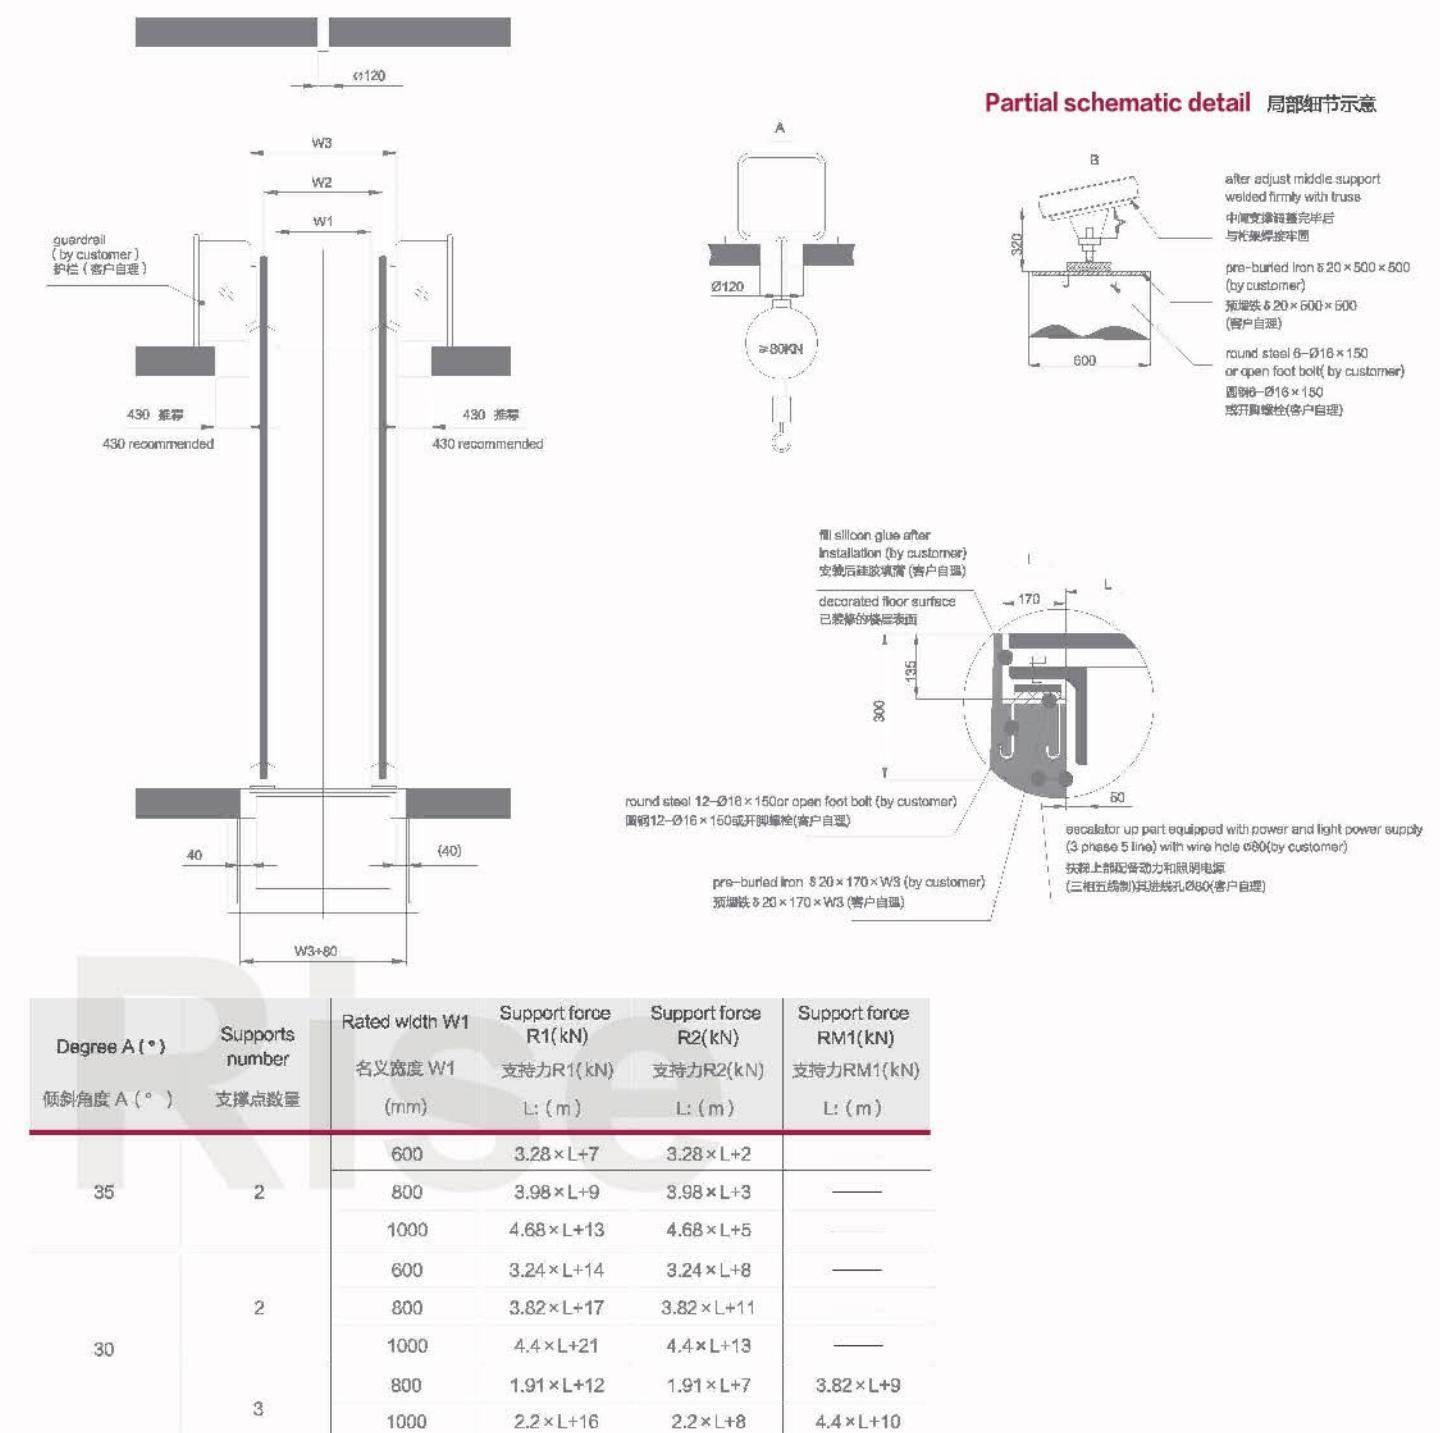

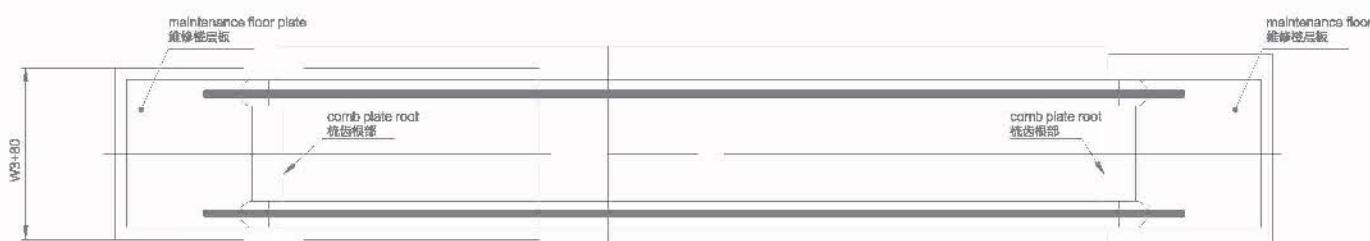

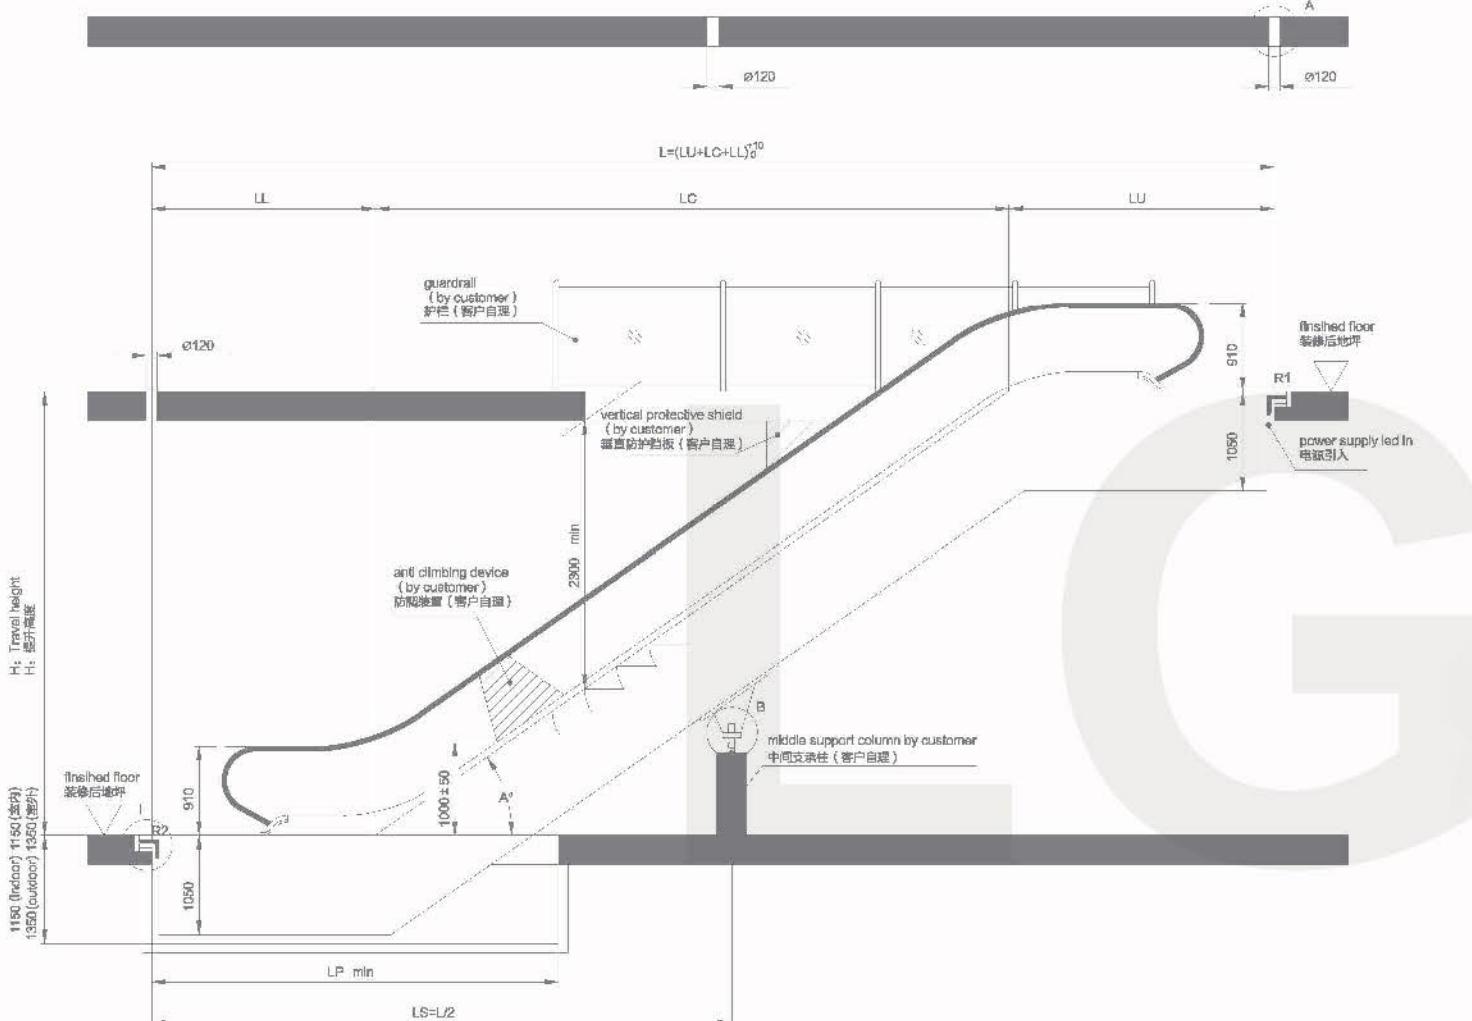

标准功能配置	Function Introduction 功能说明	Standard function configuration
Handrail anti-static device 扶手带防静电装置	This device will induct the handrail surface static electricity into ground to avoid the electric shock when passengers touch the handrail. 该装置将扶手带表面的静电导入大地，避免人手接触时的触电感。	
Start-up alarm 启动警铃	When the escalator is setting in motion, the start-up alarm will ring to warn the passengers to keep eye on their safety. 在扶梯启动时，启动警铃响起，警示乘梯人员注意安全。	
Working brake 工作制动器	It's a main device to brake the escalator. When the escalator is setting in motion, the motor brake will release and escalator runs at normal conditions. When escalator stops, the working brake will be power off and activated and thus escalator stops running. 该装置是制停扶梯的主要装置，当自动扶梯起动，主机抱闸打开，正常运行；当扶梯停止，工作制动器失电工作，扶梯停止运行。	
Machine room protection plate 机房防护板	Protection plate is used to separate moving parts area and static parts area at upper and lower machine rooms to ensure maintenance workers' safety. 在上下机房内，运动件区域和非运动件区域采用防护板隔开，保障检修人员的安全。	
Machine flywheel guard opening monitoring switch 主机飞轮打开监测开关	When use handwheel device, control system will make the motor power off, enable to start up in order to keep maintenance workers' safety. 当采用手动盘车装置盘车时，为了保护检修人员安全，控制系统使电机失电，不能起动。	
Hand wheel protection 手动盘车保护	Protection Cover is installed on machine hand wheel flywheel to keep workers from damages. 在主机手动盘车飞轮上加装保护罩，避免人员受伤。	
Main power switch 主电源开关	Main power switch is installed above the controller, which is convenient for the maintenance workers to cut off the power once enter into the machine room. 在控制柜的上方设置主电源开关，当检修人员在进入机房前就可以方便地切断电源。	
Portable lighting 手提行灯照明	Portable lighting is equipment, which can be convenient for the maintenance workers to get access to lights. 在扶梯中配置手提行灯照明，方便检修人员照明使用。	
Safety alarm signs 安全警示标志	Safety alarm signs are installed at upper and lower ends according to relevant standards to warn passengers to keep an eye on safety. 在扶梯的上下端按国标要求设置安全警示标志，提醒乘梯人员安全乘梯。	

可选功能配置	Function Introduction 功能说明	Optional function
VVVF low speed 变频低速	Adopts economic dual speed running mode according to the passenger flows where the escalators are installed. When there is no passenger, the escalator will automatically change to run at a low speed; once there is a passenger coming up, it will change to normal running speed, which is more efficient and energy-saving. 根据扶梯使用场合的流量，采用经济双速运行模式，当无人乘梯时，扶梯自动转换为低速运行；当有人乘梯时，扶梯自动转换为正常速度运行；以达到高效、节能的效果。	
Auxiliary brake 附加制动器	The auxiliary brake will be put into use when the working brake is not working or drive chain broken, which effectively slowly stop the downward running escalator and finally keep static to ensure passengers' safety. 当工作制动器失效或驱动链断裂的情况下，附加制动器工作，能有效地使向下运行的扶梯减速停止，并保持静止状态，保障乘梯人员的安全。	
Handrail broken protection device 扶手带断带保护装置	When the handrail is broken during escalator running, the handrail broken protection switch will be activated and cut off the safety circuit, and then the escalator will be stopped. 当自动扶梯在运行过程中扶手带断掉，此时扶手带断带开关动作，切断安全回路，自动扶梯停止运行。	
Skirt panel protection device 围裙板挤压保护装置	When unknown objects are into the gaps between steps and skirt panel, the skirt panel will be out of shape. When deformed to certain position, it will strike the safety switch and activate it, then the safety circuit will be cut off and the escalator stop running. 当异物进入梯级与裙板之间的缝隙时，裙板发生变形，达到一定位置后，撞击安全开关，安全开关动作，切断安全回路，自动扶梯停止运行。	
VVVF auto-start 变频自启动	Adopts smart running modes according to the passenger flows where the escalators are installed. When there is no passenger, the escalator will automatically change to run at a low speed and then stops; once there is a passenger coming up, it will automatically start up, and quickly change to normal speed running, which is smarter, more efficient and energy-saving. 根据扶梯使用场合的流量，采用智能运行模式，当无人乘梯时，扶梯自动转换为低速运行，然后自动停止；当有人乘梯时，扶梯自动启动，并快速转换为正常速度运行；以达到智能、高效、节能的效果。	
Comb lighting 梳齿照明	The comb lighting is installed on the skirt panel beside the comb plate, offering lighting to step and comb plate, which help passengers safely take the escalator. 照明安装在靠近梳齿板旁的围裙板上，为梯级和梳齿提供照明，使乘客安全乘梯。	
Handrail lighting 扶手照明	Lighting is installed at upper part of handrail balustrade, which delivers more enjoyments and safety. 在扶手栏板上部设置提供照明的照明装置，增添了乘坐的乐趣和安全性。	
Skirt panel lighting 围裙板照明	Lighting is installed at skirt panel, which delivers more enjoyments and safety. 在围裙板处设置提供照明的照明装置，增添了乘坐的乐趣和安全性。	
Oil/water separator 油水分离器	The oil and water will be separated via the oil/water separator. The water will be vented and oil regularly cleaned, which is environmentally friendly. 将扶梯中的油水经过油水分离器进行分离，雨水通过大器排出，油污进行定期清洗，起到环保作用。	
Water level safety switch 水位安全开关	When the water level reaches alarm line, the water level safety switch will be activated and cut off the safety circuit, and then the escalator will stop running. 当自动扶梯进水达到警戒水位，水位安全开关工作，切断安全回路，自动扶梯停止运行。	
Heating device 加热装置	Heating devices installed inside the escalator is mainly used to heat machine, control system, step route, comb plate and handrail ect. to avoid components frozen situations, which is suitable for public escalators at northern cold areas. 在自动扶梯内设置加热装置，主要作用是为主机、控制系统、梯路、梳齿板、扶手带等加热，解除冰冻。适用于北方寒冷地区的室外扶梯。
